

Schon länger hatte man nichts mehr von *Treeknowledge*, der kleinen Wakeskate Schmiede aus der Bundeshauptstadt, gehört. Jetzt gibt es wieder ein optisch absolut gelungenes Lebenszeichen. Die Jungs mischen seit Jahren fleißig in der deutschen Wakeskate-Szene mit und daher wollten wir euch unbedingt auch das Design für 2013 präsentieren. Hier ist es!

Nach etwa zwei Jahren Entwicklungszeit ist es endlich so weit – *Treeknowledge* präsentiert stolz das komplett neue Shape in 38“ und 40“. Kürzer heißt automatisch agiler und wendiger. Das noch gekoppelt mit dem tieferen Concave und der nagelneuen Rockerlinie und fertig ist ein Board, welches auf einer Augenhöhe mit dem heutigen Trick-Level im Wakeskating ist.

Nicht ganz, denn ein CNC gefräster Kern aus Bambus für dauerhaften Snap und noch stärker hochgezogene Board-Ecken, für müheloses Auslösen von Spins sorgen dafür, dass das 2013er Shape das beste *Treeknowledge* Brett ist, das es je gegeben hat! Dass das Top-Sheet aus Triax-Glasfaser ist, versteht sich dabei von allein. Und mit der Grafik von

Swanski

- checkt seine Homepage

www.swanarts.com

- der schon Boards für u.a. Guy Mariano designt hat, setzt man Baum noch die Krone obendrauf.

Go out and enjoy!
